Algorithms published elsewhere are included. Each entry gives the key to the classification system categories (A, B, ...); the number of the algorithm if in CAM; abbreviated title with language designator (A for Algol, F for Fortran, etc.); then month, year, page (in parentheses) in CAM, or if published elsewhere, journal designator, volume, year, page (in parentheses).
A cumulative index to algorithms published in CAM from 1960 through 1971 together with the 1972 supplemental index may be consulted in "Collected Algorithms from CAM," which is a looseleaf collection of all the algorithms, each with certifications and remarks, if any, appended.

BIBLIOGRAPHY AUTHOR INDEX DEPARTMENT INDEX

Entries in this Index are technical papers, short communications, award papers, educational reports, special papers, and topical articles. Algorithms are indexed separately; the "Index by Subject to Algorithms 1973" is on page 769 of this issue.

The KEY in each entry gives the year and volume number (7316), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author for a paper, each author is listed separately in alphabetical

order; therefore, in this section a single entry would not include co-author's names.

The DEPARTMENT INDEX groups technical papers and short communications according to the technical departments for which they were designated. Award papers, educational reports, and special papers are listed under the most nearly relevant technical departmental heading. The heading Topical Articles is used to cover the year's topical items. Under each heading, entries are given in order of original appearance.
